COVID-19 PREVENTATIVE MEASURES FOR EVENTS

- Display clear Instructions on proper handwashing.
- Provide access to hand sanitizer containing at least 70% alcohol.
- Require all attendees and staff to wear facemask during the event (except singers on stage).
- Create clear and visible signage outlining face coverings and/or other personal protective equipment rules, physical distancing requirements, and other COVID-19 specific procedures.
- Set Temperature Screening for the singers and audience
- Assign one or more staff members to enforce physical distancing and face covering requirements throughout the event.
- Assign Staff to sanitize (Ozone sanitation) the venue before, during and after the event. Clean and disinfect commonly touched surfaces like chairs, music stands, microphones, instruments etc.
- For venues with multiple concerts, clean and disinfect common spaces between each group of people. Be sure to provide enough time between groups to allow for cleaning and disinfection of commonly touched surfaces.
- Determine event capacity based on the geometry and physical characteristics of each venue.
- Set an online registration for the audience in case of free entry.
- Plan to minimise person-to-person contact by using a contactless method for exchanging or verifying items like tickets or identification, and for accepting payments at the event.
- Create a plan for contacting event-goers after the event, should it become necessary to notify them of exposure to COVID-19.

* It's definitely going to be better. Meanwhile, we will take due care of updating this document with the latest guidelines.
